# EULESS

## T O D A Y

*Did you know:*  
Fall soccer registration is July 11th from 10 a.m. - 4:30 p.m. at the Eules Family Life Center?

Dear Citizens,  
I would like to congratulate Perry Bynum and Harry Zimmer on their recent reelection to the Eules City Council. We appreciate their time and service to this great city.

You may know by now that we have had to close South Eules Pool. This pool has been in operation since 1972 and has provided many years of recreation for our residents. Recently the pool had developed two separate leaks and the cost to repair the pool would have been right around \$2 million. With attendance declining at that pool over the past several years, we made the tough decision to close it. The upside is the Splash Pad is still there and it's free! The Parks Department is making improvements to it to provide more seating and shade for families while they are there. Wilshire Pool and the Aquatic Park are both open and will keep you cool all summer long.

Thanks for keeping us FabEules!

*Linda Martin*

### The Eules City Council

- Perry Bynum Place 5

## COMMUNITY NEWS 817-685-1400 [www.eulesstx.gov](http://www.eulesstx.gov)

### Fight the Bite - Protect Yourself

The City of Eules has implemented a proactive approach to combat the mosquito population. Mosquito control programs are essential, without them, the mosquito population would flourish and cause potential health and comfort problems. Please be aware of your surroundings, if you see standing water around your residence, pour it out. If there is no stagnant water, there will be no mosquito larva. Here are some tips to help prevent mosquito breeding habitat.

- Empty out standing water from idle containers like flower pots, buckets, cups and pet water bowls.
- Clean bird baths regularly.
- Clean roof gutters to eliminate standing water.
- Repair access points in rain capturing systems or treat with larvicide.
- Apply an insect repellent that contains DEET (N,N-diethyl-m-toluamide) to exposed skin and to clothing when outdoors.

For prevention and protection, residents should apply the four D's:

- Dusk and dawn are the times of day residents should try to stay indoors. This is when mosquitoes are most active.
- Dress in light colored long-sleeve shirts and long pants when outside. For extra protection, think about spraying thin clothing with repellent.
- DEET - Use insect repellent containing DEET. Always use a repellent when outdoors. Follow product instructions, especially when using repellents on children.
- Drain standing water in and around the house and in neighborhood areas where mosquitoes can breed. Mosquitoes may develop in any water that sits stagnant for three to seven days.

*Eules Today is published by the City of Eules.*

## Summer Reading Club

Join us as we present a variety of entertainers this summer as part of our reading program. All programs begin at 2 p.m. at the Library. The SRC Superstar Lineup for July includes:

- July 11 - Dallas Zoo
- July 16 - Move Your Tale
- July 23 - Sugar Free Allstars

## Movies in the Park - Frozen

July 18, 9 p.m.

**The Leon Hogg Amphitheater**  
1951 Bear Creek Parkway

Join us at our beautiful Amphitheater and watch "Frozen." This is the Disney story of a fearless princess who is on a journey to find her sister. Bring your favorite pillow and blanket because it is all lawn seating. There will also be a designated area for lawn chairs. Doors open at 8:30 p.m. and the movie begins at dusk. Watch a great family movie and help fight hunger at the same time. Admission is one food donation per person (canned foods, fruit cups, diapers etc.) All food items donated will be given to the Tarrant Area Food Bank. Concessions will be available for purchase. Call 817-685-1666 for more information.

## Water University: Smart Watering

July 21, 6:30 - 8:30 p.m.

**Eules City Hall, 201 N. Ector Dr.**  
(\*new location!)

Get smarter with your watering habits. This program will give a general overview on Drip Irrigation, New Water Conserving Technologies, Cycle and Soak, Lawn Care, Foundation Watering, Tree Watering, Irrigation Scheduling, and Rainwater Harvesting.

These programs are taught by the Texas A&M AgriLife Research and Extension Center. The events are free, but you must register to attend. Please visit [www.eulesstx.gov/wateruniversity](http://www.eulesstx.gov/wateruniversity) or call 817-685-1821.

Seasons of Sounds Concert Series

## Havana NRG

Masterworks Series

July 31, 7 p.m.

**The Leon Hogg Amphitheater**  
1951 Bear Creek Parkway

Arts Council Northeast and the City of Eules are thrilled to welcome Havana NRG for a free concert. This nationally acclaimed group will perform their inspired set of Latin music including Salsa, Merengue, Cumbia, Cha Cha Cha, Timba and Latin Jazz tunes. The group's energetic music will have the audience dancing in the aisles. This Dallas-based band is comprised of eight talented performers who travel the country bringing hot Salsa sounds to eager audiences. The members, born mainly in Cuba, excel at achieving an energetic explosion of Latin sound. For more information on Havana NRG visit: [www.havananrglive.com](http://www.havananrglive.com). Concessions will be available for purchase. Admission is free for everyone!

## 2014 Annual Water Quality Report

Consumer Confidence Report  
(817) 685-1581 | [www.EulessTx.gov/Water](http://www.EulessTx.gov/Water)

*Este reporte incluye informacion importante sobre el agua para tomar. Si tiene preguntas o discusiones sobre este reporte en espanol, favor de llamar al tel. (817) 685-1584 para hablar con una persona bilingue en espanol.*

### Our Drinking Water Meets or Exceeds All Federal (EPA) Drinking Water Requirements

This report is intended to provide you with important information about your drinking water and the efforts made by the water system to provide safe drinking water. The City of Euless is a member of the American Water Works Association and the Texas Water Utilities Association.

### Public Participation Opportunities:

We encourage public interest and participation in our community's decisions affecting drinking water. Regular City Council meetings take place on the second & fourth Tuesdays of the month, at 7 p.m. in Euless City Hall, 201 N. Ector Dr. The public is welcome. (817) 685-1400.

### Water Sources:

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (800) 426-4791.

### Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil & gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Contaminants may be found in drinking water that may cause taste, color, or odor problems. These types of problems are not necessarily causes for health concerns. For more information on taste, odor, or color of drinking water, please contact the system's business office.

### Special Notice

You may be more vulnerable than the general population to certain microbial contaminants, such as *Cryptosporidium*, in drinking water. Infants, some elderly, or immunocompromised persons such as those undergoing chemotherapy for cancer; persons who have undergone organ transplants; those who are undergoing treatment with steroids; and people with HIV/AIDS or other immune system disorders, can be particularly at risk from infections. You should seek advice about drinking water from your physician or health care providers. Additional guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* are available from the Safe Drinking Water Hotline.

### Required Additional Health Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We are responsible for providing high quality drinking water, but we cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at [www.epa.gov/safewater/lead](http://www.epa.gov/safewater/lead).

### Where do we get our Drinking Water?

Our drinking water is obtained from surface and ground water sources. It is supplied by Trinity River Authority (Cedar Creek and Richland Chambers Lakes) and Euless water wells (Trinity Aquifer). A Source Water Susceptibility Assessment for your drinking water source(s) is currently being updated by the Texas Commission on Environmental Quality. This information describes the susceptibility and types of constituents that may come into contact with your drinking water source based on human activities and natural conditions. The information contained in the assessment allows us to focus source water protection strategies.

For more information about your sources of water, please refer to the Source Water Assessment Viewer available at the following URL: <http://www.tceq.texas.gov/gis/swaview>. Further details about sources and source-water assessments are available at <http://dww.tceq.state.tx.us/DWW>.

Maximum Residual Disinfectant Level								
Year or Range	Disinfectant	Avg. Level	Min. Level	Max. Level	MRDL	MRDLG	Measurement	Source of Contaminant
2014	Chlorine Residual, Free	2.4304	0.5	4	4	4	ppm	Disinfectant used to control microbes.

Coliform Bacteria							
MCLG	Total Coliform Maximum Contaminant Level	Highest No. of Positive	Fecal Coliform or E. Coli MCL	Total No. of Positive E. Coli or Fecal Coliform Samples	Violation	Likely Source of Contamination	
0	5% of monthly samples are positive.	0.0 percent of samples were positive		0	N	Naturally present in the environment.	

Lead and Copper								
Lead and Copper	Date Sampled	MCLG	The 90 <sup>th</sup> Percentile	Action Level	Site # Over Action Level	Units	Violation	Likely Source of Contamination
Copper	5/28/2014	27	~	27	0	ppb	No	Erosion of natural deposits; Corrosion of household plumbing systems.
Lead	8/15/12	0	1.41	15	0	ppb	No	Corrosion of plumbing systems; Erosion of natural deposits.

Regulated Contaminants								
Disinfectants and Disinfection By-Products	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Arsenic	7/24/2013	0.833	0.833 - 0.833	0	10	ppb	No	Erosion of natural deposits, Runoff from orchards; Runoff from glass & electronics production wastes.
Atrazine	5/28/2014	0.10	0.10 - 0.10	3	3	ppb	No	Runoff from herbicide used on row crops.
Barium	5/28/2014	0.051	0.051 - 0.051	2	2	ppm	No	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits.
Bromate	2014	<5	<5 - <5	0	10*	ppb	No	By-product of drinking water disinfection.
*Compliance is based on Running Annual Average of monthly averages for Bromate at the end of each quarter, which was less than 5 ppb for each quarter in 2013.								
Chromium	7/24/13	0.461	0.461 - 0.461	100	100	ppb	No	Discharge from steel/pulp mills; Erosion of natural deposits.
Cyanide	5/28/2014	26	26 - 26	200	200	ppb	No	Discharge from steel/metal factories; Discharge from plastic and fertilizer factories.
Fluoride	5/28/2014	0.498	0.498 - 0.498	4	4.0	ppb	No	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer & aluminum factories.
Nitrate (measured as Nitrogen)	5/28/2014	0.23	0.23 - 0.23	10	10	ppm	No	Runoff from fertilizer use; Leaching from septic tanks; Sewage; Erosion of natural deposits.
Nitrite (measured as Nitrogen)	2013	24	0 - 0.24	1	1	ppm	No	Runoff from fertilizer use; Leaching from septic tanks; sewage; erosion of natural deposits.
Simazine	2013	0.12	0.12 - 0.12	4	4	ppm	No	Herbicide runoff.
Total Organic Carbon (TOC) "Removal ratio"	2013	1.03	1.00 - 1.03	None	TT=1.0	None	No	Naturally present in the environment.
*Removal ratio is the percent TOC removed by the treatment process divided by the percent of TOC removal required by TCEQ.								
Turbidity								Soil runoff.
Highest single measurement	2014	0.22	0.11 - 0.22	0	TT=1.0	NTU	No	
% of samples ≤ 0.3 NTU	2014	Lowest was 100	100 - 100	100	TT=95	%	No	
Halocetic Acids (HAA5*)	2014	33.1	1 - 33.1	No goal	60	ppb	No	By-product of drinking water chlorination.
Total Trihalomethanes	2014	64.8	1 - 64.8	No goal	80	ppb	No	By-product of drinking water chlorination.
*Not all samples results may have been used for calculating the Highest Level Detected because some results may be part of an evaluation to determine when a compliance sampling should occur in the future.								

Unregulated Contaminants								
Contaminant	Collection Date	Average	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Bromodichloromethane	2014	15.16	1.0 - 30.1			ppb		By-product of drinking water chlorination.
Chloroform	2014	11.02	1.0 - 22.1			ppb		By-product of drinking water chlorination.
Dibromochloromethane	2014	5.46	1.0 - 8.4			ppb		By-product of drinking water chlorination.

Radionuclides								
Contaminant	Collection Date	Highest Single Sample	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Beta/alpha emitters	6/23/08	4.6	4.6-4.6	0*	50*	pCi/L	No	Decay of natural and man-made deposits.
*MCLG and MCL are given in exposure units of millirems/year (set at 0 and 4, respectively), but samples are measured in activity units of pico Curies/Liter (pCi/L). EPA considers 50 pCi/L to be the level of concern for Beta particles.								

Secondary and Other Constituents Not Regulated									
Contaminant	Collection Date	Highest	Range of Levels Detected	Secondary Limit	MCLG	MCL	Units	Violation	Likely Source of Contamination
Aluminum	5/28/2014	51	51 - 51	200			ppb	No	Abundant naturally occurring element.
Bicarbonate (as Calcium carbonate)	5/28/2014	98	98 - 98	None			ppm	No	Erosion of carbonate rocks such as limestones.
Calcium	5/28/2014	40.4	40.4 - 40.4	None			ppm	No	Abundant naturally occurring element.
Chloride	5/28/2014	21.8	21.8 - 21.8	300			ppm	No	Abundant naturally occurring element. Used in water purification; By-product of oil field activity.
Conductivity @ 25°C	5/28/2014	384	384 - 384	None			µmhos/cm	No	Ability of water to conduct electricity due to electrolytes.
Copper	5/28/2014	27	27 - 27	1000*			ppb	No	Erosion of natural deposits; Corrosion of household plumbing.
*This secondary limit is for Copper as a nuisance contaminant, apart from the primary list because it can stain fixtures and impart a bitter metallic taste to drinking water.									
Magnesium	5/28/2014	4.40	4.40 - 4.40	None			ppm	No	Abundant naturally occurring element.
Manganese	5/28/2014	1.0	1.0 - 1.0	50			ppb	No	Naturally occurring element.
Nickel	5/28/2014	1.4	1.4 - 1.4	None			ppb	No	Naturally occurring element.
Potassium	5/28/2014	4.67	4.67 - 4.67	None			ppm	No	Naturally occurring element.
pH	2014	8.9	7.1 - 8.9	>7.0			pH unit	No	Measure of the corrosivity of water.
Sodium	5/28/2014	28	28 - 28	None			ppm	No	Abundant naturally occurring element; By-product of oil field activity.
Silver	5/28/2014	09	09 - 09	100			ppb	No	Naturally occurring element.
Sulfate	5/28/2014	44.5	44.5 - 44.5	300			ppm	No	Naturally occurring constituent; Common industrial by-product; By-product of oil field activity.
Total Alkalinity (as Calcium carbonate)	5/28/2014	98	98 - 98	None			ppm	No	Naturally occurring soluble mineral salts.
Total Dissolved Solids	5/28/2014	219	219 - 219	1000			ppm	No	Total dissolved mineral constituents in water.
Total Hardness (as Calcium carbonate)	5/28/2014	119	119 - 119	None			ppm	No	Naturally occurring soluble Calcium and Magnesium deposits.

Radioactive Contaminants								
Contaminant	Collection Date	Highest Level Detected	Range of Levels Detected	MCLG	MCL	Units	Violation	Likely Source of Contamination
Combined Radium 226/228	2011	2	2-2	0	5	pCi/L	No	Erosion of natural deposits.

**Definitions:** The following tables contain scientific terms and measures, some of which may require explanation.

**Maximum Contaminant Level Goal or (MCLG):** The level of a contaminant in drinking water below which there is no known or expected health risk. MCLGs allow for a margin of safety.

**Maximum Contaminant Level or (MCL):** The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Residual Disinfectant Level Goal (MRDLG):** The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contamination.

**Maximum Residual Disinfectant Level (MRDL):** The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

**Action Level Goal (ALG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. ALGs allow for a margin of safety.

**Action Level (AL):** The concentration of a contaminant which, if exceeded, triggers treatment or other requirements a water system must follow.

**Avg:** Regulatory compliance with some MCLs are based on running annual average of monthly samples.

**MFL:** Million Fibers per Liter (a measure of asbestos)

**NTU:** Nephelometric Turbidity Units (a measure of turbidity)

**pCi/L:** Picocuries Per Liter, a measure of radioactivity

**ppm:** Parts Per Million or Milligrams Per Liter - or one ounce in 7,350 gallons of water

**ppb:** Parts Per Billion or Micrograms Per Liter - or one ounce in 7,350,000 gallons of water

**ppt:** Parts per Trillion or Nanograms Per Liter (ng/L)

**ppq:** Parts per quadrillion, or picograms per liter (pg/L)

**N/A:** Not Applicable.

## Aquatics

*Eules Family Life Center*

300 W. Midway Dr. 817-685-1666

For a full listing of swim lessons, please visit [www.playeules.com](http://www.playeules.com) or pick up a copy of the Summer Eules Playbook magazine.

### Classes for July include:

Swim Lessons: Water Tots, Parent & Tot, Level 1, Level 2, Level 3, Level 4 *plus* Arthritic Aerobics, Water Conditioning, Water Toning, Cardio by Aqua, Hydro-Resistance, Aqua Agility, Aqua Fitness, Deep Water Aerobics, Splash Zumba, Aqua Cross Training, Wilshire Fit Zumba, Hydro-Dynamic Deep Aerobics, Tabata 101, Power Tabata

- Seniors: \$30 / month unlimited classes (must be an Aquatic Member)
- Under 60: \$45 / month unlimited classes (must be an Aquatic Member)
- Register for an individual class
- Punch Pass and drop in classes also available.

## Summer Natatorium Open Swim Hours

Mon. - Fri.	11:40 a.m. – 5 p.m.
Sat.	10:30 a.m. – 3 p.m.
Sun.	Noon – 3 p.m.

## July Happenings at the Senior Center

The Eules Family Life Senior Center requires that all participants become a member. It's SIMPLY FabEules to join. Complete a membership form, have your picture made and the ADVENTURE begins. Memberships are open to the 60+ population. Please contact the center at 817-685-1671 for membership fees. The center offers a variety of activities for the 60+ members. Some of the ADVENTURES you may experience ...

- **Health and Wellness Classes:** Tai Chi 16 Form, Gentle Yoga, TLC Yoga, Zumba Toning, Senior Abs, Quiet Yoga, Chair Training, Core and Stretch, Simple Somatics, Afternoon Yoga, Aerobic Strength, Tai Chi 49 Form, Zumba and Pickleball.
- **Arts and Crafts Classes:** Scrapbook Pages, Weave Me Alone-Basket Class, Card Making, Crochet, Oil Painting with Joan, You Can Paint with Robert Garden School of Art and Quilting.
- **Social:** Mystery Lunch, Dining Out and Thursday Night Social.
- **Games and Such:** Billiards, Bunco, variety of card games and Domino games, Party Bridge, Texas Hold'em, Mah Jongg and much more.
- **Music:** Jammers
- **Health Screening and Seminars:** Lunch and Learn, Medicare Q and A and much more
- **Special Interest:** Genealogy, "Hey Whatcha Reading" Book Club
- **What's Happening:** Tap Dancing, Line Dancing, iPad, Kindle and Tablet with the Library staff, Cooking Classes, Essential Oils classes, Basic Spanish for Travelers Part 2, Protect your Back, Computer and Internet Basics and much more.

For more information please call or stop by the center to get your SIMPLY FabEules Adventure started.

# CALENDAR & CLASSES
