

MILLENNIUM

ADVANCED CREMATORY TECHNOLOGY

SPECIFICATIONS:

DIMENSIONS:

- L 15 ft 3 in 4.65 m
- W 5 ft 4 in 1.62 m
- H 7 ft 1.5 in 2.17 m

FUEL OPTIONS:

- Natural Gas
- L.P. Gas
- Oil

ELECTRICAL OPTIONS:

- 115/230/380/415/460 Volts
- 50 or 60 Hertz
- Single or Three Phase

BURNERS:

- High efficiency, low emission
- Roof mounted
- Optimum burner angle for maximum flame penetration

REFRACTORY:

- Designed to last 30% longer
- 30% less costly to repair
- Ceramic Fiber Modules accelerate cool down time and minimize heat transfer to external steel surfaces
- Revolutionary floor design

EMISSIONS:

- Automatic temperature controls
- One second retention time in secondary chamber for superior emission control
- Refractory-lined stainless steel hot air ducts for rust-free maximum performance

LOADING:

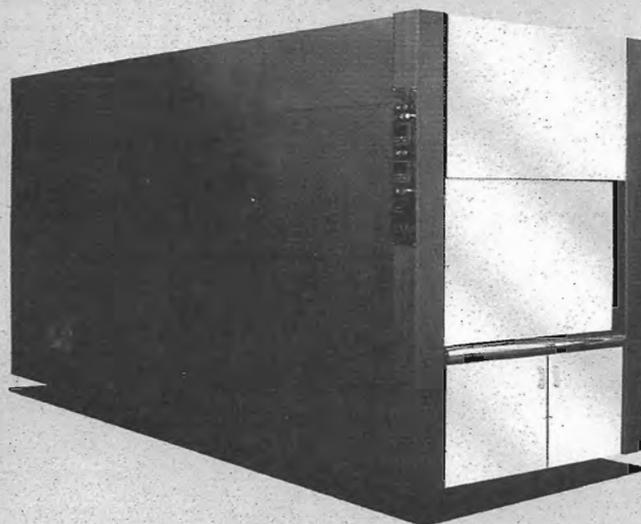

- Permanent chrome roller at church truck height
- Power operated door

CLEARANCES:

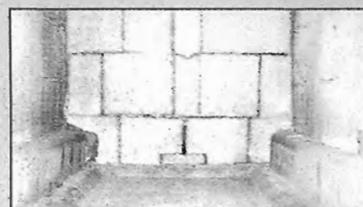

- From Combustible Wall:
1 in 0.03 m
- Rear Service Area:
30 in 0.76 m
- Top of Cremator to Ceiling:
30 in 0.76 m
- Loading Clearance at Front:
7 ft 2.14 m
- Around Hot Air Duct:
4 in 0.10 m

WARRANTY:

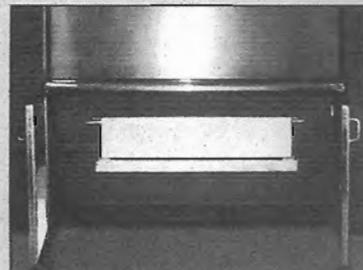

All CMS Cremators are backed by our 2-year limited warranty

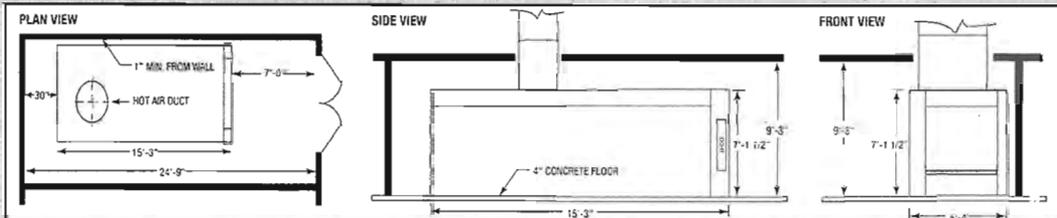

REVOLUTIONARY HEARTH DESIGN

FRONT LOADED CREMAINS TRAY

CLEARANCE SPECIFICATIONS

The Millennium III Cremator is a product of pure innovation. We've taken the best qualities of traditional manufacturing methods and integrated advanced crematory technology to bring the cremation industry to an entirely new level of performance, efficiency and convenience.

The redesigned combustion chamber of the Millennium III challenges the conventions of the outdated "hot hearth" designs. The design maximizes combustion, completely controls fluids, and makes sweep out effortless. Unlike "hot hearth" units, the Millennium III design does not require heating both sides of the hearth refractory. This means that the refractory abrades on only one side, lasts longer, costs less to replace, and therefore saves you money.

The Millennium III is more efficient, cremates faster, and is quieter than comparably priced units. It will also meet or exceed EVERY environmental emission requirement for crematories around the world – Guaranteed!

For added convenience, the ash compartment in the Millennium III is located in the front of the unit. Cremains are easily loaded into the sweep-out tray through the stainless steel front access doors. Simply lift out the tray and load it into the Millennium Dust-Free Cremains Processor. It's that easy!

The Millennium III is designed to cremate in two hours or less and its advanced refractory design allows it to cool down in just 1/2 hour or less. So, whether you perform six cremations per day or one per week, the Millennium III cremator will meet your needs.
